Response to Amendment

The amendment filed 3/24/2003 has been entered. Claim 73 has been canceled. Claims 66, 67, 70 and 70-74 have been amended.

Response to Arguments

Any previous rejections that are not reiterated herein have been withdrawn.

Applicant's arguments with respect to claims 66-72 and 74-77 have been considered but are moot in view of the following new ground(s) of rejection.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 66-72 and 74-77 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 6,323,313. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 1 is generic to all that is recited in the claims (e.g., claim 10) of the patent. Claim 10, *inter alia*, falls entirely within the scope of claim 1 as claimed, in other words, claim 1 is anticipated by claim 10 of the patent. Specifically, claim 10 of the patent is drawn to a modified annexin with a metal radionuclide which is complexed directly to the annexin through a three amino acid extension having a glycine and cysteine residue. Such an annexin is directly within that of claim 1, which includes an extension having both glycine and cysteine residues in the extension, as shown by dependent claims 76-71. Also, claim 6 of the patent recites that the annexin is annexin V, as set forth in claim 72 as claimed.

Conclusion

No claims are allowed at this time.

NOTE: The application can provisionally be placed in condition for allowance by filing a proper terminal disclaimer to overcome the double patenting rejection set forth above.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
